

MIMOSA Supplier Inclusion & Diversity Policy

MIMOSA is committed to fostering inclusion and diversity in our supplier relationships. We will seek partnerships with businesses owned by underrepresented groups, including minorities, women, and local enterprises, to support equitable economic opportunities and reflect the communities we serve.

While MIMOSA has no employees we work with our members, collaboration partners, and suppliers encouraging them to also support such goals.

In the US, we are seeking collaboration with universities including historically black colleges and universities. They are part of our effort to establish infrastructure asset management solutions for local and regional communities where skills for residents and small businesses are being developed and used.

The MIMOSA members and collaboration partners (universities and other associations) in other nations are pursuing similar objectives with their own diverse communities.
